👤 PROFILE SNAPSHOT

I'm a MERN Stack Developer with hands-on experience in React.js, JavaScript, Node.js, Express.js, and MongoDB, focused on building responsive, scalable, and user-friendly full-stack web applications. I also have experience with REST APIs, JWT authentication, Git/GitHub, and WordPress development.

📁 EXPERIENCE

MERN Stack Developer

07/2025 – Present

Arbaj Technology

- Developed and maintained full-stack web applications end-to-end using React.js, Node.js, Express.js, and MongoDB, following the MVC architecture for maintainable and scalable code.
- Designed and integrated RESTful APIs to enable smooth frontend-backend communication, structured data exchange, and efficient state management across applications.
- Built responsive, cross-browser user interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3, optimized for both desktop and mobile devices.
- Designed MongoDB schemas using Mongoose and handled database operations for efficient data storage, retrieval, and validation.

📁 PROJECTS

Electrmart

E-commerce Web Application

electro-mart-ecommerce-website.vercel.app

- Developed a responsive, full-featured e-commerce application using the MERN stack, covering product listing, cart, and checkout flows.
- Implemented product management, REST APIs, and CRUD operations, with MongoDB used for persistent data storage and retrieval.
- Built secure user authentication, client-side form validation, and mobile-responsive user interfaces.
- Deployed and hosted the live application on Vercel with a CI-friendly deployment workflow.

Club Management

Management Web Application

club-management-lilac.vercel.app

- Developed a complete club management system to handle guest entries, table bookings, and member records.
- Implemented authentication, role-based access, CRUD operations, and third-party API integration.
- Built responsive interfaces for managing guest details, table allocation, payments, and bookings in real time.
- Deployed the application on Vercel for live access and continuous updates.

Arbaj Technology Website

Company Website

arbajtechnologypvtltd.com

- Developed and deployed a responsive company website to showcase services, portfolio, and business information.
- Built using React.js, JavaScript, HTML5, and CSS3, with an emphasis on performance, responsive design, and clean navigation.

🎓 EDUCATION

B.Tech, Computer Science Engineering

Rajpura

[Swami Vivekanand Institute of Engineering & Technology](#)

🧠 SKILLS

Frontend

React.js · JavaScript (ES6+) · HTML5 · CSS3 · Responsive Design

Database

MongoDB

Development

CRUD Operations · API Integration · Form Validation

CMS

WordPress

Backend

Node.js · Express.js · RESTful APIs

Authentication

JWT Authentication

Tools

Git · GitHub · VS Code
