CAREER OBJECTIVE

To contribute as a MERN Stack Developer in a growth-driven organization, applying hands-on experience in building scalable full-stack applications while strengthening expertise in modern JavaScript technologies and collaborative development practices.

EXPERIENCE

MERN Stack Developer

Arbaj Technology | July 2025 - Present

- Developed and maintained full-stack web applications end-to-end using React.js, Node.js, Express.js, and MongoDB, following the MVC architecture for maintainable and scalable code.
- Designed and integrated RESTful APIs to enable smooth frontend-backend communication, structured data exchange, and efficient state management across applications.
- Implemented secure CRUD operations and JWT-based authentication with protected routes, ensuring reliable session handling and data security.
- Built responsive, cross-browser user interfaces using React.js, JavaScript (ES6+), HTML5, and CSS3, optimized for both desktop and mobile devices.
- Designed MongoDB schemas using Mongoose and handled database operations for efficient data storage, retrieval, and validation.
- Collaborated with another developer using Git and GitHub for version control, integrating workflows and delivering clean, production-ready solutions.
- Performed functional testing, resolved bugs, and optimized application performance, usability, and reliability.

PROJECTS

Electrmart — E-commerce Web Application

[electro-mart-ecommerce-website.vercel.app](#)

- Developed a responsive, full-featured e-commerce application using the MERN stack, covering product listing, cart, and checkout flows.
- Implemented product management, REST APIs, and CRUD operations, with MongoDB used for persistent data storage and retrieval.
- Built secure user authentication, client-side form validation, and mobile-responsive user interfaces.
- Deployed and hosted the live application on Vercel with a CI-friendly deployment workflow.

Club Management — Management Web Application

[club-management-lilac.vercel.app](#)

- Developed a complete club management system to handle guest entries, table bookings, and member records.
- Implemented authentication, role-based access, CRUD operations, and third-party API integration.
- Built responsive interfaces for managing guest details, table allocation, payments, and bookings in real time.
- Deployed the application on Vercel for live access and continuous updates.

Arbaj Technology Website — Company Website

[arbajtechnologyvpvtltd.com](#)

- Developed and deployed a responsive company website to showcase services, portfolio, and business information.
- Built using React.js, JavaScript, HTML5, and CSS3, with an emphasis on performance, responsive design, and clean navigation.

Jaguar Café & Club — WordPress Website

[jaguarscafeclub.in](#)

- Developed and maintained a responsive WordPress website for a live hospitality business, customizing layouts, pages, and table/event booking functionality per business requirements.

PROFILE SNAPSHOT

MERN Stack Developer with 1-2 years of hands-on experience delivering full-stack web applications using React.js, Node.js, Express.js, and MongoDB.

Proficient in REST API design, JWT authentication, MongoDB schema design, and responsive UI development.

Proven track record of independently building and deploying 4+ live, production-grade web applications.

EDUCATION

B.Tech, Computer Science Engineering

SVIET, Rajpura

SKILLS

Frontend

React.js · JavaScript (ES6+) · HTML5 · CSS3 · Responsive Design

Backend

Node.js · Express.js · RESTful APIs

Database

MongoDB

Authentication

JWT Authentication

Development

CRUD Operations · API Integration · Form Validation

Tools

Git · GitHub · VS Code

CMS

WordPress

LANGUAGES

English

Professional working proficiency

Hindi

Native proficiency

STRENGTHS

- Strong problem-solving and debugging ability
- Quick learner, adapts fast to new tech stacks
- Clear communicator and team collaborator
- Detail-oriented with a focus on clean code
